## Chemeketa Community College Foundation Wine Industry Professional Training Application

The Wine Industry Professional Training curriculum is designed to further technical grape and wine knowledge while creating awareness of potential career, entrepreneurial, and leadership opportunities in the wine industry. This training is specifically designed for current vineyard workers who have a desire to expand their opportunities in the wine industry. It is a non-credit training that serves as a potential pathway to credit programs throughout the state at institutions serving the wine industry. This training is a partnership between AHIVOY, Chemeketa Community College, Linfield University, and the Erath Family Foundation.

AHIVOY is a non-profit organization providing education and professional development opportunities to vineyard stewards in the Oregon wine industry. Founded and led by successful Latinx wine professionals, AHIVOY seeks to break down the barriers that many vineyard workers face in relation to education and training. This training provides opportunity to overcome socioeconomic challenges so vineyard stewards may support their families and build careers in the wine industry.

AHIVOY makes scholarships for this program possible by receiving generous donations, organizing fundraising events, and securing grants. Additionally, the Erath Family Foundation provides financial support to increase the number of personnel in leadership roles who have a fundamental education in viticulture along with a working command of the English language.
